

QUICK
SOLUTION
SERVICES

PROFILE

Integrated Industrial, Engineering & Energy Field Solutions

1. Executive Summary & Corporate Experience

Welcome to **Quick Solution Services Profile**, a premier, multi-disciplinary industrial engineering services partner. We serve major players across the modern Oil & Gas, Infrastructure Construction, Energy, and Enterprise Engineering sectors. With years of proven expertise, we offer a dynamic portfolio that links advanced technical execution directly with rigorous compliance and absolute asset reliability.

Our company specializes in delivering turnkey high-pressure cleaning solutions, elite metal fabrication engineering, robust equipment distribution ecosystems, full-cycle mechanical electrical and civil workflows, and critical commercial support functions. We build long-term contractual relationships with clients by consistently maintaining low incident rates, zero unexpected asset downtime, and superior project deployment speeds.

CORE MISSION	REGULATORY STANDARD	FLEET CAPABILITY
Uncompromising safety, engineered precision, and robust operational agility across all harsh environments.	All operating methods perfectly map to OSHA frameworks, ASME code specifications, and strict ISO guidelines.	24/7 technical deployment readiness for heavy industrial equipment, high-powered machinery, and vital logistics.

2. Core Business Divisions & Capabilities

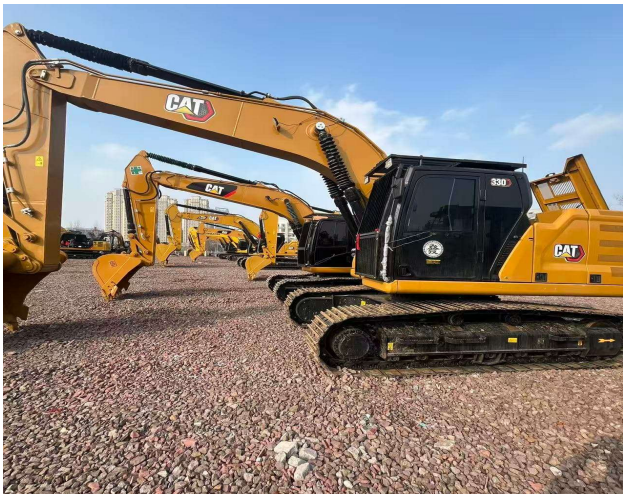

Division A: Upstream Oilfield & Heavy Industrial Services

- **Ultra-High-Pressure (UHP) Hydro Jetting Solutions:** Operating advanced mechanical pumping rigs capable of delivering safe, persistent water-blast pressures up to **30,000 PSI**. This allows for flawless internal and external decontamination, scale removal, and clearance of drill pipes, drill collars, heat exchangers, production tubing, and heavy surface oilfield assemblies.
- **Heavy-Duty Structural Fabrication & Machining:** Precision manufacturing, assembly, and testing of complex master frame skids, custom vibration-absorbing foundation bases, heavy transport rigs, and engineered structural systems tailored to severe field workloads.
- **Heavy Equipment Asset Maintenance Contracts:** Providing preventative, predictive, and full turnkey mechanical diagnostic repair operations to protect expensive industrial fleets from costly unplanned operational downtime.

Division B: Industrial Equipment Rental Solutions

- **Temporary On-Site Power Generation:** A vast fleet of heavy-duty industrial diesel Generator Sets (Gensets) optimized for robust performance, continuous high-kV load distribution, and severe climate weather configurations.
- **Mobile High-Intensity Tower Lights:** Heavy-duty multi-fixture light towers for brilliant visibility during critical 24/7 night-shift production windows and remote site exploration projects.
- **Heavy Material Handling Vehicles:** Certified high-capacity industrial forklifts and versatile mechanical mobile cranes configured for safe heavy equipment transport and complex structural rigging.
- **Earthmoving Fleet Assets:** Robust, industry-certified excavators, mechanical loaders, and structural earthmoving machinery built to handle immediate site preparation and major grading projects.

Division C: Civil Engineering, MEP & HVAC Contracting

- **Civil Work Infrastructure Contracts:** Executing large-scale earthworks, reinforced concrete structural foundations, structural site drainage frameworks, retaining barriers, and general commercial masonry workflows.
- **Integrated MEP Projects:** Comprehensive design, technical installation, and ongoing testing protocols for major Mechanical, Electrical, and Plumbing engineering systems within massive commercial and industrial complexes.
- **Industrial HVAC Engineering:** Design and maintenance of commercial Heating, Ventilation, and Air Conditioning layouts, ensuring optimal thermal control, dust-filtration, and air exchange in delicate or dangerous site settings.

Division D: Workforce Deployment, Safety Supply & Remote Hospitality

- **Technical Oil & Gas Personnels & Consultants:** Providing elite, thoroughly vetted technical engineering experts, site supervisors, and specialists to lead upstream exploration and downstream refinery actions.
- **Personal Protective Equipment (PPE) Supply:** Sourcing and distributing fully certified, high-grade safety equipment (including respiratory protection, fire-retardant uniforms, impact gear, and gas detection instruments) to protect teams in high-risk zones.
- **Remote Camp Hospitality Management:** End-to-end administration, strict sanitization protocols, housekeeping, and complete living-quarters hospitality optimization for large-scale industrial and oilfield production camps.
- **Oil & Gas Field Catering Services:** High-volume, highly nutritious food prep and catering operations designed to feed extensive field personnel crews, strictly obeying international food safety standards.

3. Workforce Technical Expertise & Professional Skills

Our field operations succeed due to the elite competencies of our personnel. Every single operator, engineer, and consultant undergoes continuous technical testing, safety drills, and performance tracking to guarantee unmatched delivery for our clients.

Operational Discipline / Role	Core Technical Capability & Certification Baseline
Certified 6G & ASME Structural Welders	Elite high-pressure manual arc and gas metal fabrication. Specialized in heavy skid manufacturing, structural foundation anchor alignment, and structural steel load testing.
UHP Hydro-Jetting Technicians	Expert implementation of 30,000 PSI machinery, rigorous pressure safety valve testing, localized line blockage extraction, and hazardous asset isolation procedures.
Licensed MEP & HVAC Engineers	Intricate system balancing, electrical schematic mapping, complex mechanical load calculations, industrial duct architecture design, and automated building management systems.
Oil & Gas Field Crew & Hospitality Staff	Rigorous compliance with certified QHSE protocols, advanced food safety and hazard control (HACCP) rules, and high-volume asset hospitality management.

4. Oil & Gas Consultation Services

Our dedicated advisory team delivers high-level strategic counsel, regulatory navigation, and specialized engineering oversight for complex energy projects. We combine deep industry insights with advanced technical analysis to optimize asset lifecycles, mitigate operational risks, and ensure absolute compliance with evolving global energy standards.

Category	Service Code	Designation
Well Testing	WT1	Site Coordinator
	WT2	Senior Supervisor
	WT3	Day Shift Supervisor
	WT4	Night Shift Supervisor
	WT5	Data Acquisition Engineer
	WT6	Senior Operator
	WT7	Operator
	WT8	Junior Operator
Slickline	SL1	Senior Slickline Supervisor
	SL2	Slickline Supervisor
	SL3	Slickline Operator
Coil Tubing	CT1	Senior Coiled Tubing Supervisor
	CT2	Coiled Tubing Supervisor
	CT3	Coiled Tubing Senior Operator
	CT4	Coiled Tubing Operator
	CT5	Coiled Tubing Engineer
	CT6	Coiled Tubing Field Technician (Electronics / Mechanical / Hydraulic)
Cementing	CMT1	Senior Cementing Supervisor
	CMT2	Cementing Supervisor
	CMT3	Cementing Operator
	CMT4	Cementing Engineer
	CMT5	Cementing Field Technician (Electronics / Mechanical / Hydraulic)
Simulation	STM1	Senior Stimulation Supervisor
	STM2	Stimulation Supervisor
	STM3	Stimulation Operator
	STM4	Stimulation Engineer
	STM5	Stimulation Field Technician (Electronics / Mechanical / Hydraulic)
HSE	HSE1	Senior Health, Safety, and Environment Specialist (Western)
	HSE2	Senior Health, Safety, and Environment Specialist (Non-Western)
	HSE3	Health, Safety, and Environment Specialist

We look forward to the opportunity to collaborate and help streamline your upcoming project
